Languages

English

Native Speaker

German

C1

French

Native Speaker

Hobbies

Chess

Puzzles, Classical, Blitz

Football

Left back

Reading

Self-development, History, Fantasy, Stoic

Interests

Web Development

I am concious of the number of people one can reach on the internet, and I am on a journey to master web development, in order to create applications that are not limited geographically.

Machine Learning and AI

I don't only love it, I am facinated by how many ways in which it can be applied. I hope to one day tailor models, to solve problems that could help humanity move forward in science and technology.

Data Science

In a Data driven world like our own, I believe it is a valuable asset to be able to analyse the data and derive useful information from it. Like Clive Humby said, "data is the new oil", and I love refining it to get fuel.
